

Week 5 : Assignment 5

The due date for submitting this assignment has passed. Your last recorded submission was on 2026-08-25, 18:34 IST.

Due date on 2026-08-26, 23:59 IST

1. Aging is a solution to the starvation problem

1 Point

- ☒ True
☐ False

Yes, the answer is correct. Score: 1

Accepted answer is True

2. 4 processes A,B,C,D have estimated burst times of 4,5,6,7 ns respectively. They are scheduled in round robin fashion and the time slice is of 2ns. The processes A,B,C,D arrive at the 0,0.1,0.2,0.3 ns respectively. At what time will the process A complete? _____

1 Point

14

No, the answer is incorrect. Score: 0

Accepted answer is Type: Numeric: 10

3. 4 processes A,B,C,D have estimated burst times of 4,5,6,7 ns respectively. They are scheduled in round robin fashion and the time slice is of 2ns. The processes A,B,C,D arrive at the 0,0.1,0.2,0.3 ns respectively. At what time will all the processes complete? _____

1 Point

22

Yes, the answer is correct. Score: 1

Accepted answer is Type: Numeric: 22

4. 4 processes A,B,C,D have estimated time of completion of 5,7,9,11 ns each. They are scheduled in round robin fashion and the time slice is of 2ns. The processes A,B,C,D arrive at the 0,1,2,3 ns respectively. At what time will the process C complete? _____

1 Point

20

Week 5 : Assignment 5

The due date for submitting this assignment has passed. Your last recorded submission was on 2026-08-25, 18:34 IST.

Due date on 2026-08-26, 23:59 IST

4. 4 processes A,B,C,D have estimated time of completion of 5,7,9,11 ns each. They are scheduled in round robin fashion and the time slice is of 2ns. The processes A,B,C,D arrive at the 0,1,2,3 ns respectively. At what time will the process C complete? _____

1 Point

20

No, the answer is incorrect. Score: 0

Accepted answer is Type: Numeric: 29

5. 4 processes A,B,C,D have estimated time of completion of 5,7,9,11 ns each. They are scheduled in round robin fashion and the time slice is of 2ns. The processes A,B,C,D arrive at the 0,1,2,3 ns respectively. At what time will the processes complete execution? _____

1 Point

32

Yes, the answer is correct. Score: 1

Accepted answer is Type: Numeric: 32

6. In Question 4, what will be the completion time of process C, if Shortest Job First was used instead of Round Robin. _____

1 Point

21

Yes, the answer is correct. Score: 1

Accepted answer is Type: Numeric: 21

7. Many more context switches occur when using (non-pre-emptive) Shortest Job First scheduling instead of Round Robin scheduling

1 Point

- ☐ True
☒ False

Yes, the answer is correct. Score: 1

Accepted answer is False

Week 5 : Assignment 5

Due date on 2026-08-26, 23:59 IST

The due date for submitting this assignment has passed. Your last recorded submission was on 2026-08-25, 18:34 IST.

☒ False

Yes, the answer is correct. Score: 1

Accepted answer is False

8. A Round Robin Scheduling algorithm with a large time slice will behave similar to a First-Come-First-Serve algorithm.

1 Point

☒ True

☐ False

Yes, the answer is correct. Score: 1

Accepted answer is True

9. The overhead due to context switches is less if the time slice durations are small

1 Point

☐ True

☒ False

Yes, the answer is correct. Score: 1

Accepted answer is False

10. Starvation can occur in the Shortest Remaining Time First (SRTF) algorithm and Shortest Job First (SJF) algorithm.

1 Point

☒ True

☐ False

Yes, the answer is correct. Score: 1

Accepted answer is True
